Multi-Agent system for Automated Invoice Processing

Agent 1 (A1): Document Processing Agent – reads the uploaded invoice PDF directly (Gemini 3.5 Flash-Lite) and extracts structured fields.

Agent 2 (A2): Completeness Gate (Tier 1) – checks five hard requirements. Any failure is disqualifying; the invoice is rejected outright.

Agent 3 (A3): Soft-Signal Scoring & Decision (Tier 2) – for invoices that clear the gate, checks softer risk signals and produces a confidence score. 95+ is auto-approved; anything lower is escalated.
